Education

Cimage Professional College (AKU)

2021 – 2024

Bachelor of Computer Application

Patna, Bihar

+2 High School Piro, Bhojpur

2019 – 2021

Intermediate In Arts

Technical Skills

Languages and Database: Python, OOPs, Django, Flask, FastAPI, REST APIs, MySQL, SQL

Other Skills: Linux, Bash, SSH, Systemd, VMware, Dell VxRail, Clustering, AWS, Docker, Git, GitHub, LangChain, LangGraph, RAG, AI Agents

Experience

• **Linux Administrator | Scholar Trainee**

Sept 2025 – Present

Wipro Limited, Hyderabad

- Working in enterprise Linux infrastructure support, handling system administration, troubleshooting, incident management, and production support.
- Working with VxRail and VMware environments as part of enterprise infrastructure and virtualization operations.
- Troubleshooting system services, permissions, networking, system health, and infrastructure issues while following enterprise support processes.

Personal Projects

Face Recognition | Python (NumPy, Open CV)

Jan 2025

Git-Repo: https://github.com/ansh19kr/py_face_data

- Designed and implemented a real-time face detection and dataset generation system using OpenCV and NumPy.
- Utilized Haar cascade classifiers for accurate facial recognition, capturing and preprocessing facial images in real-time.
- Applied image resizing and grayscale conversion techniques to optimize data quality. Collected and structured facial data into NumPy arrays for seamless integration into machine learning models, enabling facial recognition and analysis applications.

Linux Server Monitoring API | Python, FastAPI, Linux, Docker

Git-Repo: [ansh19kr/linux-server-monitor](https://github.com/ansh19kr/linux-server-monitor)

- Using Python and Linux system information with Docker to create a lightweight, deployable infrastructure monitoring solution.
- Developing a FastAPI-based monitoring service to expose Linux system health metrics such as CPU, memory, disk and process usage through REST APIs.

GenAI IT Support Agent | Python, FastAPI, LangGraph, Linux

Git-Repo: [ansh19kr/genai-it-support-agent](https://github.com/ansh19kr/genai-it-support-agent)

- Built an AI-powered IT support agent that uses LLMs and tool calling to diagnose common system issues.

- Integrated Linux diagnostic tools for CPU, memory, disk, network, and service troubleshooting.
- Developed REST APIs using FastAPI with a responsive web interface for real-time issue analysis and recommendations.
