Education

Cimage Professional College (AKU)

2021 – 2024

Bachelor of Computer Application

Patna, Bihar

+2 High School Piro, Bhojpur

2019 – 2021

Intermediate In Arts

Bhojpur, Bihar

Technical Skills

Languages and DataBase: Python, Pandas, Numpy, MySQL, Java, HTML/CSS, Oops

Tools: Power BI, Jupyter Notebook

Other Skills: Advanced Excel, WordPress, Data Analysis, Linux (Basic), VM Ware

Personal Projects

Face Recognition | Python (NumPy, Open CV)

Jan 2025

 **Git-Repo:** https://github.com/ansh19kr/py_face_data

- Designed and implemented a real-time face detection and dataset generation system using OpenCV and NumPy.
- Utilized Haar cascade classifiers for accurate facial recognition, capturing and preprocessing facial images in real-time.
- Applied image resizing and grayscale conversion techniques to optimize data quality. Collected and structured facial data into NumPy arrays for seamless integration into machine learning models, enabling facial recognition and analysis applications.

Amazon Product Availability Checker | Python

Nov 2024

 **Git-Repo:** <https://github.com/ansh19kr/DA-project1>

- Developed a Python script to monitor the availability of products on Amazon. Utilized libraries such as requests and lxml for web scraping, with a schedule for automated task scheduling.
- Implemented XPath for parsing product availability data from the webpage and integrated error handling for robust performance.
- Enabled periodic checks with randomized intervals to avoid detection by Amazon's anti-bot mechanisms.

Achievements / Extracurricular Activities
